Metrosoft Poland received the grant to scale-up and replicate Fundsphere Terms software. Fundsphere Terms is based on OpenTerms standard which provides a way for asset managers, their clients and their intermediaries to describe terms of business, including fees, commissions and distribution rights. The program provides grants to companies that can demonstrate disruptive solution that is already deployed in operating environment. The grant aims to help to promote, scale-up and replicate a solution that is a game changer. Only a handful of companies out of over 1000 applicants received the grant in this round.

I am tasked with successful completion of this challenging project over next 24 months.
